# OUR HISTORY

Global Marine Survey  
Algeria

is an independent inspection company, established in Algeria since 1994, it acts in all Algerian ports and provides a complete range of inspection, quality control and consulting services.

*We understand that you need to be where the business is. No matter where in the world you are, you can rely upon the same consistent and meticulous findings whether that be in the confines of the laboratory or the unforgiving field environment.*

## EXPERIENCE OUR EXPERTISE

Our expertise and experience is something that as a company nurture and preserve. We have a wealth of information that we draw upon to guarantee the quality and reliability of our services.

## OUR SERVICES

### CARGO INSPECTION & TESTING

**GMSA** surveyors use industry-accepted sampling techniques to perform independent measurements and assurance that the required product specifications have been attained. All backed up by the relevant national/international standards certification you need

## ONBOARD QUANTITY SURVEY

We can offer a dedicated survey to verify onboard the vessel the Onboard Quantity of fuel, lubes and sludges. During this survey special attention is given to adjustments in vessel piping, verify sounding tables. All findings are reported in a comprehensive report.

## H&M / TECHNICAL SURVEYS

**GMSA** surveyors have experience in a broad range of disciplines. They can advise and conduct inspections into a number of areas to assist with insurance and damage claims.

## PRE-PURCHASE INSPECTION

We can attend any type of ship, tanker, bulk-carrier, container-ships, ferry, ro-ro, car-carriers, livestock vessels, etc., to carry out pre-purchase inspection in order to assess the condition of the ship prior to be purchased.

We carry out ship pre-purchase inspections on behalf of buyers, appointed by a wide range of companies.

## DAMAGE SURVEY

In case of any marine accident involving a ship, on request, **GMSA** in a prompt and appropriate manners, surveys the extent of damage to the vessel's hull and/or machinery, ascertains the actual cause of damage if possible, determines the reasonable repair specifications if requested, estimates the reasonable costs of repair, and finally issues a survey report as early as practicable.

## DRAFT SURVEY

We conduct draft surveys on a variety of different ship types and cargoes.

We use internationally recognized methods and modern equipment for measuring the necessary variables for an accurate outcome. We have a highly professional and specifically trained group of surveyors dedicated for handling of draft surveys.

## CONTAINER INSPECTION

**GMSA** container inspection services have been specifically developed for those clients that not only require reassurance during the container loading and unloading process, but also confirmation that safety and quality requirements are met and that correct goods handling procedures are put in place and adhered to.
